Philippines | 09948310571 | alvincentsangco@gmail.com | LinkedIn: www.linkedin.com/in/alvincent-sangco-8a4085290 | GitHub: <https://github.com/ltmervin123>

PROFESSIONAL SUMMARY

Full-Stack Developer with 2 years of experience specializing in Web Development, AI-driven automation, RAG pipelines, media processing workflows, and scalable RESTful APIs. Proven track record of transforming complex requirements into production-ready systems, with a focus on optimizing latency and enhancing evaluation accuracy through LLM integration.

TECHNICAL SKILLS

Frontend: Reactjs, Nextjs, Vite, TailwindCSS, Tanstack Query, Zustand, Zod
Language: JavaScript, Typescript
Backend: Node.js, Express.js, Hono.js, REST API, Socket.io
Database: MongoDB, Redis, PostgreSQL
Cloud & DevOps: Render, Vercel, Google Cloud Storage, Cloudinary
AI & Data: Anthropic/Gemini API, RAG Pipelines, Audio Transcription Pipelines (Whisper/Google STT), Vector Database
Tools & DevOps: Git, GitHub Actions, Postman, Docker, Google Cloud Storage, Cloudinary, Vercel, Render

PROFESSIONAL EXPERIENCE

Backend Developer (Full Stack – Backend-Focused)

HR-Hatch Tech | 2024 – Present

- Development of an automated reference check pipeline that processed 100+ candidates weekly by integrating Gemini/Claude APIs to automate candidate assessment report.
- Designed and implemented RESTful APIs for audio processing, AI evaluation, authentication, and real-time features.
- Optimized API response latency by 40% by implementing Redis caching layers and optimizing Mongoose aggregation pipelines for complex data retrieval.
- Integrated third-party services including Claude AI, Google Cloud Storage, and Speech-to-Text APIs.
- Optimized backend services and async processing to reduce latency in AI evaluation requests and improve system responsiveness.
- Collaborated with product stakeholders to deliver scalable, maintainable features.

PROJECT EXPERIENCE

Snappcheck - AI-Powered Reference Check Automation System | Back End | 2024 – 2025

Tech Stack: React, Node.js, Express, MongoDB, Anthropic API, Google Services, Redis

- Designed backend architecture and data models to support automated reference checking workflows.
- Built APIs for managing candidates, reference requests, and AI-generated evaluations.
- Integrated AI services and Google APIs to automate data processing and analysis.
- Optimized database queries and background jobs for performance and reliability.
- Deployed and tuned the system for production use.

TORS - Criminology Reviewer System | Back End | 2025

Tech Stack: React, Node.js, Express, MongoDB, Cloudinary,

- Built backend structure, schemas, and core APIs for a digital reviewer platform.
- Implemented secure media handling and integration with Cloudinary.
- Connected frontend features with backend services and deployed the application.

Prepwise - AI-Powered Mock Interview Simulator (Capstone Project) | Full Stack | 2025

Tech Stack: React, Node.js, Express, MongoDB, Anthropic API, Google Services, Redis

- Architected the full-stack system for an AI-powered mock interview platform.
- Implemented browser-based video recording, audio transcription, and AI-driven feedback generation.
- Built scalable backend services to handle media uploads, processing, and evaluation.

EDUCATION

Bachelor of Science in Information Technology (BSIT)

Northern Mindanao Colleges Inc. | Graduating: 2026
