PROFESSIONAL SUMMARY

Full-stack software engineer experienced in building web and mobile applications, AI-powered systems, automation workflows, scalable RESTful APIs, and 3D/AR applications. Skilled at translating complex business requirements into reliable, production-ready solutions, with hands-on experience integrating LLMs, RAG pipelines, and media processing workflows to automate processes and improve system efficiency and accuracy.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Vue.js

Backend: Node.js, Express.js, Hono.js,

Language: JavaScript, Typescript

Mobile: Quasar/Capacitor, React Native

Database: MongoDB, Redis, PostgreSQL, SQLite

Cloud & DevOps: Git, GitHub Actions, Postman, Docker, Google Cloud Storage, Cloudinary, Vercel, Render

AI & Data: Anthropic/Gemini API, RAG Pipelines, Audio Transcription Pipelines (Whisper/Google STT), Vector Database

PROFESSIONAL EXPERIENCE

Software Developer

FSUU BIRC | 2026 – Present

- Develop and maintain web and mobile applications incorporating augmented reality (AR) capabilities.
- Integrate and optimize 3D models for educational and scientific research applications.
- Implement application features with consideration for mobile performance, offline usage, and cross-platform compatibility.

Backend Developer (Full Stack – Backend-Focused)

HR-Hatch Tech | 2024 – 2026

- Development of an automated reference check pipeline that processed 100+ candidates weekly by integrating Gemini/Claude APIs to automate candidate assessment report.
- Designed and implemented RESTful APIs for audio processing, AI evaluation, authentication, and real-time features.
- Optimized API response latency by 40% by implementing Redis caching layers and optimizing Mongoose aggregation pipelines for complex data retrieval.
- Integrated third-party services including Claude AI, Google Cloud Storage, and Speech-to-Text APIs.
- Optimized backend services and async processing to reduce latency in AI evaluation requests and improve system responsiveness.
- Collaborated with product stakeholders to deliver scalable, maintainable features.

SELECTED PROJECTS

- **Snappcheck** - AI-Powered Reference Check Automation System | Back End
- **TORS** - Criminology Reviewer System | Back End
- **Prepwise** - AI-Powered Mock Interview Simulator (Capstone Project) | Full Stack

EDUCATION

Bachelor of Science in Information Technology (BSIT)

Northern Mindanao Colleges Inc. | 2026
